

GEAR LIST

Over the course of your sailing journey you may well encounter weather conditions far beyond anything you will experience in the city. You must have the suitable clothing and equipment.

Please ensure that you obtain all of the gear outlined on the list below, please stick to this list and don't bring too much as there is limited space downstairs for gear.

GEAR PROVIDED: Full wet weather jacket and trousers to wear over your own gear. Life jackets.

Please bring your own rain jacket for on shore activities.

Please note:

- Denim jeans, cotton t-shirts and casual shoes are **totally unsuitable** for the conditions we will be encountering in the Hauraki Gulf. When they get wet they don't dry and are cold.
- An electronic devices policy is agreed with your group leader. If you are allowed to bring **i-pods, mobile phones and cameras on board** then there are opportunities for photos and videos to be made during the journey. We would recommend a dry pouch or sealable plastic bag to protect them from the elements and the safety of these devices will be your responsibility.

You **MUST** have all the above equipment to be prepared for your journey. The preference should be to borrow any gear from the above list that you do not personally own.

Most importantly, all the above gear must fit into one soft bag as space is limited downstairs.
